

Bandwidth

Our highly-optimized global carrier blend, exceptional levels of customer service, and extensive service portfolio translate into the perfect solution to fit any company's needs.

InfoRelay currently serves thousands of clients in carrier neutral data centers across the continental United States with an optimized global carrier bandwidth blend.

Our bandwidth, combined with our extensive portfolio of customized services ensures that you receive the perfect solution to fit your needs.

Outstanding Quality

By initiating BGP sessions with our providers in each market, InfoRelay can seamlessly route your network traffic over the best available carrier to the end user location. This results in extremely low latency routes throughout global routing tables.

InfoRelay can deliver the power of over 12 global carriers directly to your network through a single fiber or copper connection.

Did You Know?

InfoRelay provides a robust mix of top global Internet carriers, including:

- *Level 3*
- *Savvis*
- *Time Warner Telecom*
- *Cogent*
- *Hurricane Electric*
- *nLayer*
- *Global Crossing*
- *PCCW*
- *Interconnections to local, regional and national providers through peering platforms*

Key Features

- If any carrier in the InfoRelay blend is experiencing network issues, traffic can be preferred to another carrier and the issue can be “routed around”
- BGP selection chooses the best available path based on number of hops or closest peer
- Carrier grade routers handle full global routing tables
- InfoRelay’s network capacity never exceeds more than 40% sustained usage
- The InfoRelay carrier mesh provides you with a guaranteed 99.999% uptime delivery promise

The InfoRelay Difference

InfoRelay has well over 100Gbps of network capacity through some of the most well respected carriers in the world. If you are considering going directly to a carrier, here are some points to consider:

- We see some of the best rates offered in the industry so we are able to offer aggressive rates to our clients
- Since we route through dozens of Internet carriers, we supply a larger number of available routes than any one Tier I carrier can provide on their own
- The InfoRelay carrier mesh is trusted in dozens of private and public cloud platforms and is proven to meet the high availability requirements posed by cloud deployments
